Professional Experience

Customertimes (2022 - 2025) — Salesforce Consultant / OPS Support Engineer

Salesforce User Management: Efficiently create, manage, and maintain user records within Salesforce.

User Access & Security Management: Manage profiles, permission sets, roles, and security settings to ensure compliance and proper system access.

Reporting & Dashboard Development: Develop comprehensive reports and dashboards to visualize data and facilitate informed decision-making.

Salesforce Automation & Process Optimization: Configure workflows, validation rules, Flow automations, and process improvements to enhance operational efficiency.

Sandbox Testing & Quality Assurance: Conduct thorough testing in sandbox environments to validate system issues.

SOQL Data Querying & Management: Proficiently execute SOQL queries to retrieve and manipulate data as per business requirements.

Bulk Data Operations: Perform bulk updates and modifications to records, ensuring data accuracy and consistency.

Ticketing & Workflow Management: Effectively utilize Jira and Click-Up to report, track, and manage tickets, ensuring timely issue resolution and task management within Salesforce operations.

Tier 1 Support & Troubleshooting: Provide Tier 1 support, troubleshoot issues, and offer solutions for improving system functionality and performance.

CSS Pain Relief (2021 - 2022) — Office Manager

Business Development & Strategic Partnerships: Identify and cultivate strategic partnerships and lead business development efforts to expand the company's client base and market presence.

Healthcare Compliance & Regulatory Guidance: Provide guidance and expertise on healthcare regulations, ensuring the company and its clients remain compliant with evolving industry standards and legal requirements.

Client Compliance Communication & Support: Manage communication with clients regarding compliance requirements, providing guidance and necessary documentation to ensure their understanding and adherence to regulations.

Patient Records & Documentation Management: Maintain accurate records of patient interactions and compliance-related communications.

Selina Suarez Consulting / PepUp Tech (2021) — *Jr. Salesforce Administrator / Program Coordinator*

Salesforce Data Migration & Integrity: Execute large-scale data transfers within Salesforce, ensuring accuracy and completeness while maintaining data integrity.

Reporting & Dashboard Optimization: Develop and refine reports and dashboards to provide actionable insights and support informed decision-making.

Salesforce Configuration & Compliance: Review and correct organizational-wide settings within Salesforce to ensure compliance and alignment with established standards.

Student Data Management: Oversee student data and information for the Fall 2021 cohort within PepUp Tech, ensuring accurate and up-to-date records.

UAT Support & Quality Assurance: Support testing efforts for new features, enhancements, or system configurations to maintain data integrity and system reliability.

Salesforce Customization Support: Contribute to the customization of Salesforce objects, fields, page layouts, and validation rules under supervision.

Team Collaboration & Professional Development: Attend team meetings, discussions, and training sessions to gain insights and contribute to ongoing projects and improvements.

Data Integrity & Governance: Maintain data quality through deduplication, validation, imports, exports, and ongoing system audits.

Stakeholder Collaboration & Requirements Gathering: Work with internal teams to identify business needs, document requirements, and support Salesforce enhancements.

QPI Healthcare Services (2019 - 2020) — *Compliance Specialist & Practice Manager*

Healthcare Compliance Documentation Management: Led the end-to-end creation and management of compliance documentation for DME companies and pharmacies, enabling eligibility for Medicare and insurance reimbursement.

Regulatory Applications & Stakeholder Collaboration: Collaborated directly with client stakeholders and internal leadership to complete federal and state applications, ensuring continuous compliance and operational readiness.

KPI Development & Performance Improvement: Introduced and implemented a custom HARP KPI framework (HR Documentation, Account Management, Reaction Time, Patient Satisfaction) to track and improve performance across teams.

Workflow Automation & Systems Management: Streamlined workflows and compliance tracking using Microsoft SharePoint, Excel, Salesforce, and healthcare systems such as NPPES, PECOS, Epic, and AdvancedMD.

Adaptability & Regulatory Operations Support: Learned to adapt quickly across healthcare verticals, enhancing organizational agility, client trust, and documentation accuracy under regulatory deadlines.
